**Subject:** FW: Best Practices for minimizing dust emissions

Yesterday I spoke with the owner of the MAT Asphalt Co. in McKinley Park about fugitive dust best practices that he can look at for his facility.

I told him I'd email them to him, so I just did that and will follow up with him next to see if he has any questions.

Hello Mr. Tadin,

Here (attached) are the Best Practices for dust control that I mentioned to you during our phone conversation yesterday. Please look them over and see if there are any practices that may help minimize dust emissions from the MAT asphalt plant in McKinley Park.

Thank you.
